

# B's STUDIO™

## BHA Integrated media Software Solution

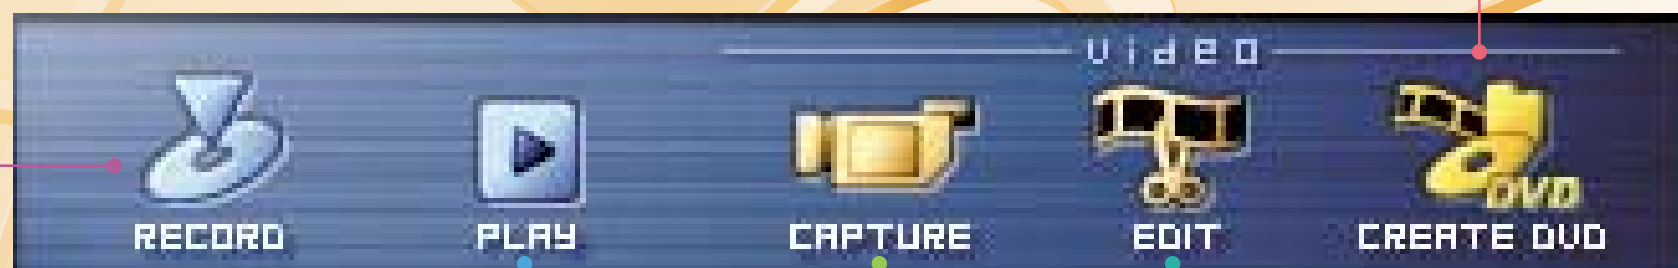

### Launch yourself into instant media creation with B's STUDIO!

B's STUDIO is packed with a collection of easy-to-access, flexible and fun features for creating CDs and DVDs. You can for example capture your home video, edit it and create a DVD-Video to view on a TV or PC in a few simple steps. Of course you can also backup your data, make music compilations or copy a disc plus much more!

### Would you like a personal "navigator" to guide you?

To assist with the process of creating a particular type of CD or DVD, B's STUDIO adds an intuitive navigator toolbar on your desktop to provide you with instant access to the best functions suited for the task. Whatever type of disc you would like create, B's STUDIO's navigation toolbar will help you finish off your CD or DVD project without hassle!

### CREATE DVD

Turn your videos into custom DVDs or VCDs. Regardless of if your video material is stored on your hard disk or you capture video from a camcorder or VCR, the route to creating your DVD-Video project, including menus, sound and titles, is equally straight-forward.

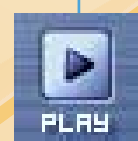

- Create DVD-Video titles and VCDs for playback on set-top DVD players and PCs.
- Create your own menu system by using the professionally designed templates and frames. Alternatively use your own graphics for a more personal touch.
- Include slide shows with digital photos and images.
- Create Moving Menus where a preview of your video plays in the button on the DVD menu.
- Create chapter points automatically or simply insert them manually at any point.
- Add or mix audio tracks to your video content as background music or sound effects.
- Add "live" voice-over and narration using a microphone connected to your PC to bring further life to your DVDs or VCDs.
- Create DVDs with Dolby Digital and LPCM compression that allows you to save disc capacity and you can store more DVD-Video on your DVD media.
- Supports DVD+RW Video Recording Format (VR). This flexible format allows you to modify your DVD-Video disc, for example correct a spelling error on a menu title, change the menu background, or add or removing video clips, without having to rewrite the entire disc.

### RECORD

The easy to understand functions and visual wizard guides help you record virtually any type of disc: music, photo, video, data or backup.

- Rip the tracks from a music CD and save them as MP3 or WAV files.
- Easily create music CDs by just dragging and dropping tracks.
- Turn your old LPs or analog recordings into CDs with the **Direct Cut** function, which allows you to connect and record any analog sound input onto a CD.
- Copy a CD or DVD in a simple one-step process for safeguarding or sharing.
- Make reliable file or image backups of your hard disk to CD or DVD.
- Collect and share your digital pictures on CD.
- Supports recording to all current optical storage formats: CD-R/RW, DVD+RW/+R, DVD-R/RW, and DVD-RAM.

### PLAY

The simple-to-use DVD-Video player software gives you great quality viewing of your homemade or commercial DVD-Video titles.

- Change the look of the player with different skins.
- Repeat a video passage by selecting start and end points.
- Zoom into a specific portion of the frame to take a closer look.
- Capture snapshots of your favorite video frames as bitmap images or Desktop Wallpapers.
- Support for subtitles, angles and multi-channel sound.

### CAPTURE

Capture digital or analog video clips directly from a Digital Video (DV) camcorder or any analog device, such as an analog camcorder, VCR or TV and store on your hard disk in a format preformatted for DVD or VCD creation.

- Ultra-fast, real-time capture and conversion to high-quality DVD (MPEG-2) or VHS-quality VCD (MPEG-1) formats on PCs faster than 1.0GHz.
- Digital video is captured via a FireWire port; analog capture requires a capture device with S-Video or Composite Video input.
- Store video on your hard disk as MPEG-1, MPEG-2, or AVI files.
- Supports PAL and NTSC input (also automatically converts from PAL to NTSC/NTSC to PAL if needed)

### EDIT

The video editor offers powerful movie making tools for any budding director.

Add a little imagination, a few mouse clicks and both beginners and video enthusiasts will enjoy the result of trimming, cutting or splicing their scenes.

- Give your production a professional touch with a wide range of quality content including fun frames, professional animated titles, and music themes.
- Cut, slice, and stretch your movie clips with powerful editing tools.
- Drag, drop and arrange clips and scene transitions in Storyboard mode.
- Edit audio, video and titles down to frame-level accuracy in Timeline mode.
